Bathing Water Profile

PROFILE 10 – Data updated for 2025

SLIEMA: Fond Ghadir Beach

Qui-Si-Sana Beach

13 August 2026

Direttorat ghas-Sahha Ambjentali
Environmental Health Directorate

Update to the Bathing Water Profile based on the report by the European Environment Agency issued in May 2026

Under the provisions of the Bathing Water Directive (BWD), 2006/7/EC, as transposed by Legal Notice 125 of 2008 and amended by Legal Notice 237 of 2011 87 bathing water monitoring points are monitored in the Maltese Islands. The monitoring data and other information regarding bathing water management are reported to the European Environment Agency at the end of the official monitoring season to assess and publish information on the state of the Bathing Water of the Maltese Islands. This bathing water profile is in accordance with, regulation 11, and Schedule III of the legal notice.

Bathing water profile 10 covers 4 monitoring points situated in the locality of Sliema as per **Figure 2 and Table 1**. Located along Malta's northeastern coast large areas along the promenade of Tower Road and Qui Si Sana Road Sliema. These bays are made form rocky shore and has clear, turquoise waters with bathing pools carved into the rocks. The area is

surrounded by a number or restaurants and high-rise buildings.

The monitoring points B12, B13, B14 have and B15 been monitored for 23 weeks, by the Environmental Health Directorate. The monitoring period for the official bathing season starts on the third week of May till the third week of October. For the year 2025 the monitoring day where 12th May till 19th October.

The bathing water quality is based on two microbiological parameters (Escherichia coli and Intestinal enterococci). These two parameters determine the classification of the bathing water quality as 'excellent', 'good', 'sufficient' or 'poor'. The symbols shown in **Figure 1** below correspond to this classification. The European Environment Agency report for the year 2025 indicated that 88.5% of the bathing water classified as excellent quality, see **Figure 3**. (European Environmental Agency, 2026).

Classification updated for the year 2025.

Figure 3: Results of bathing water quality in Malta from 2005 to 2025

Trend of coastal bathing water quality in Malta. Notes: Each column represents an absolute number of bathing waters in the season. The 'good' and 'sufficient' quality classes are merged for comparability with the classifications under the preceding Bathing Water Directive 76/160/EEC.

(European Environment Agency, 2026)

Table 2: Classification of bathing waters

	2006/7/EC Classification <i>based on four years data</i>					
Escherichia coli (cfu/100 ml)	< 250	Excellent quality	< 500	Good quality	> 500	Sufficient quality
Intestinal Enterococci (cfu/100ml)	< 100	Excellent quality	< 200	Good quality	> 200	Sufficient quality

Table 3: Bathing water quality classification at (2022 - 2025)

2006/7/EC Classification <i>based on four years data</i>				
Bathing Water ID Numbers	Year	Escherichia coli	Intestinal Enterococci	Overall Classification
B12	2025	Excellent	Excellent	Excellent
B13		Excellent	Excellent	Excellent
B14		Excellent	Excellent	Excellent
B15		Excellent	Excellent	Excellent
B12	2024	Excellent	Excellent	Excellent
B13		Excellent	Excellent	Excellent
B14		Excellent	Excellent	Excellent
B15		Excellent	Excellent	Excellent
B12	2023	Excellent	Excellent	Excellent
B13		Excellent	Excellent	Excellent
B14		Excellent	Excellent	Excellent
B15		Excellent	Excellent	Excellent
B12	2022	Excellent	Excellent	Excellent
B13		Excellent	Excellent	Excellent
B14		Excellent	Excellent	Excellent
B15		Excellent	Excellent	Excellent

Further information on bathing water results is available on the Environmental Health Directorate website www.bathingwater.gov.mt

c

Identification and assessment of causes of pollution that might affect bathing waters and impair bathers' health;

The risk factor for monitoring sites B12 is high risk B13 & B14 is medium risk and for B15 is low risk. The risk factor was calculated on possible sources of contamination and the risk of occurrence. These include rainwater culverts and surface water runoff that discharge directly into the official bathing site, if there any sewage pumping station or main sewers in the vicinity, if currently there is a construction activity ongoing and if in the past four years there were reports of short-term pollution and or a bathing prohibition period.

The probability of temporally closing the monitoring site B15 is very low, for B13 & B14 is low and for B12 is medium. This was calculated on the number of health warnings issued for the last four years.

Temporary closing of bathing water sites during bathing season 2025

Sites B12, B13 & B14 covered by this Bathing Water Profile were temporarily closed during the bathing season of 2025 as bathing prohibition reports.

Report for B13 & B14: https://environmentalhealth.gov.mt/wp-content/uploads/2025/07/BPP-Report-B13_14.pdf

The sign is a red rectangular notice with white text. At the top, it reads 'AVVIŻ MID-DIRETTORAT GHAS-SAĦHA AMBJENTALI' and 'ENVIRONMENTAL HEALTH DIRECTORATE NOTICE'. Below this, in large bold letters, is 'BATHING NOT RECOMMENDED'. The sign features a large red 'X' over a swimming person icon. It includes the text 'MINHABBA ĊIRKOSTANZI MHUX TAS-SOLTU, HUWA RAKKOMANDAT LI GHALISSA MA JSIRX GHAWM F'DAWN L-INNAWI. JIDDISPJACINA GHAL DAN L-INKONVENJENT.' followed by 'DUE TO EXTRAORDINARY CIRCUMSTANCES, BATHING IN THIS AREA IS TEMPORARILY NOT RECOMMENDED. ANY INCONVENIENCE CAUSED IS REGRETTEED.' and translations in Italian, German, and French. It also lists flags for Malta, UK, Italy, Germany, and France. At the bottom, there is contact information for the 24hr information service, the directorate's name in Maltese and English, and a QR code.

GOVERNMENT OF MALTA
OFFICE OF THE DEPUTY PRIME MINISTER
AND MINISTRY FOR HEALTH

What should one do if a pollution incident is noticed?

If a risk of bathing water pollution (on-shore or off-shore) is noted, the Environmental Health Directorate is to be immediately notified by calling.

356 2095 4992 during Office Hours:

or

356 2545 0000 after Office Hours / Weekends / Public Holidays:

Or sending an email on: wrau.ehd@gov.mt

When a complaint is received the Environmental Health Officers (EHOs) will investigate accordingly and if necessary, elevate samples. During the period of any short-term pollution and or bathing prohibition, the EHOs will elevate samples from the bathing site on a daily basis to monitor its quality.

Once the nuisance is resolved and the results of three consecutive bathing water samples conform to the parameters stipulated in the Legal Notice 125 of 2008, indicated that there is no risk to bathers, the warning will be lifted.
